👤 PROFILE

Motivated and detail-oriented B.Tech Computer Science (AI & ML) student with hands-on experience in full-stack web development and machine learning projects. Skilled in Python, Java, React, and ML algorithms with a strong foundation in problem-solving and collaborative work. Proven leadership through role as President of the university's sports committee. Eager to contribute to innovative software and AI-driven solutions.

🎓 EDUCATION

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) 2022 – present
University of Petroleum and Energy Studies Dehradun, India

Senior Secondary (CBSE) Jabalpur, India
St. Aloysius Senior Secondary School

📁 EXPERIENCE

NASSCOM 06/2025 – 07/2025
Intern Remote

AI Intern — NASSCOM (Generative AI Program)

- Gained hands-on experience with Generative AI technologies, including LLMs and prompt engineering.
- Participated in research discussions and workshops on emerging GenAI trends.

Maa Narmada Vriddha AAshralaya Sanstha 06/2023 – 07/2023
Intern Jabalpur, India

Social Intern — Maa Narmada Vriddha Ashralaya Sanstha (Old Age Home) Assisted in daily care, emotional support, and engagement activities for elderly residents; organized wellness programs and community outreach initiatives; developed empathy, communication, and social responsibility through direct service and interaction.

🧠 SKILLS

Languages: — C • Java • Python • HTML • CSS • JavaScript | **Frameworks/Technologies:** — Machine Learning • Data Analysis • MERN | **Tools:** — VS Code • IntelliJ IDEA • CLion • PyCharm • Git | **Soft Skills:** — Problem-Solving • Communication • Team Collaboration

📁 PROJECTS

Disney+ Clone

React, CSS

- Built a responsive clone of the Disney+ UI using React with dynamic routing and reusable components.
- Integrated Redux for state management and ensured seamless user interaction.

Disease Detection System

Python, Machine Learning

- Developed a machine learning model to predict diseases from symptoms using classification algorithms.
- Improved model accuracy through preprocessing, cross-validation, and feature optimization.

Sentiment Analysis with Transformer-Based Encoders

Python, HuggingFace, Transformers

- Built a sentiment analysis model leveraging both generative and mixed encoder architectures.
- Fine-tuned models on social media and financial text datasets to evaluate sentiment polarity.

LSTM-Based Hate Speech Detection System

Python, NLP, Deep Learning

- Designed a sequential model using LSTM networks to identify hate speech in social media content.
- Preprocessed text with tokenization and embedding layers for optimal input to the LSTM architecture.
- Evaluated performance on benchmark datasets and achieved high classification accuracy.

📜 CERTIFICATES

- J.P. Morgan Software Engineering Virtual Experience on Forage - September 2024
- Walmart USA Advanced Software Engineering Virtual Experience Program on Forage - September 2024
